MINOR PROJECT SYNOPSIS

TITLE: PLACEMENT CELL WEBSITE

Location: Department of Artificial Intelligence and Data Science,
Jaipur Engineering College and Research Center Jaipur.

● Introduction

A dedicated platform designed to empower students and faculty in their career development and placement journey. Our goal is to connect aspiring students with top employers and top MNC companies while supporting faculty in mentoring and guiding their students toward success.

For students, we offer tools such as career counseling, skill development resources, and personalized job opportunities to help you kickstart your professional journey. For faculty, we provide access to student progress analytics, industry connections, and resources to enhance their advisory roles and foster meaningful placements.

At PLACEMENT CELL WEBSITE, we aim to create a collaborative environment where talent meets opportunity, preparing the next generation for a bright and successful future. Join us in shaping careers and creating impactful networks today!

● Objective

The primary objective of PLACEMENT CELL WEBSITE is to serve as a comprehensive platform that bridges the gap between academic institutions and the professional world, ensuring that students and faculty are equipped with the resources and opportunities needed for successful career outcomes.

1. For Students:

- To provide a user-friendly platform that offers tailored job opportunities based on individual skills, qualifications, and career aspirations.
- To support students in enhancing their skills, and developing competencies through training modules and skill assessment tools.
- To foster confidence in students by offering access to internships and full-time placements in reputable organizations.

- To connect students with industry leaders and top employers, enabling them to kickstart their careers with meaningful roles.

2. For Faculty:

- To empower faculty members with tools to mentor and guide students effectively by providing access to real-time analytics on student progress, achievements, and placement readiness.
- To create an environment where faculty can collaborate with industries and recruiters to build lasting partnerships that benefit the student body.
- To assist faculty in identifying skill gaps in students and addressing them through specialized training programs and workshops.

● **Methodology/ Planning of work:**

1. Research & Analysis:

- a. Identify stakeholder needs (students, faculty, recruiters).
- b. Analyze competitors to identify gaps and opportunities.

2. Design & Development:

- a. Develop a user-friendly platform with portals for students, faculty, and recruiters.
- b. Integrate features like AI-based job recommendations, analytics dashboards, and communication tools.
- c. Conduct thorough testing and quality assurance.

3. Launch & Implementation:

- a. Start with a soft launch for pilot testing.
- b. Roll out a full-scale launch with marketing campaigns.

4. Training & Onboarding:

- a. Provide workshops for students on resume building, job applications, and interview skills.
- b. Train faculty on using analytics tools and fostering industry connections.

5. Maintenance & Improvement:

- a. Gather feedback, resolve issues, and continuously update features to enhance user experience.

- **Literature Review:**

The development of job placement platforms has been widely studied as an essential tool for bridging the gap between academia and industry. Research highlights the importance of using technology, such as AI-driven job recommendations and skill assessment tools, to enhance employability among students. Studies also emphasize the role of faculty in guiding students through mentorship, aided by real-time analytics and data-driven insights. Existing platforms often lack personalized support and collaborative features, underscoring the need for an integrated solution that caters to the unique needs of students, faculty, and recruiters. This project builds on these insights to create a comprehensive platform for career advancement and academic-industry collaboration.

- **Applications of the app :**

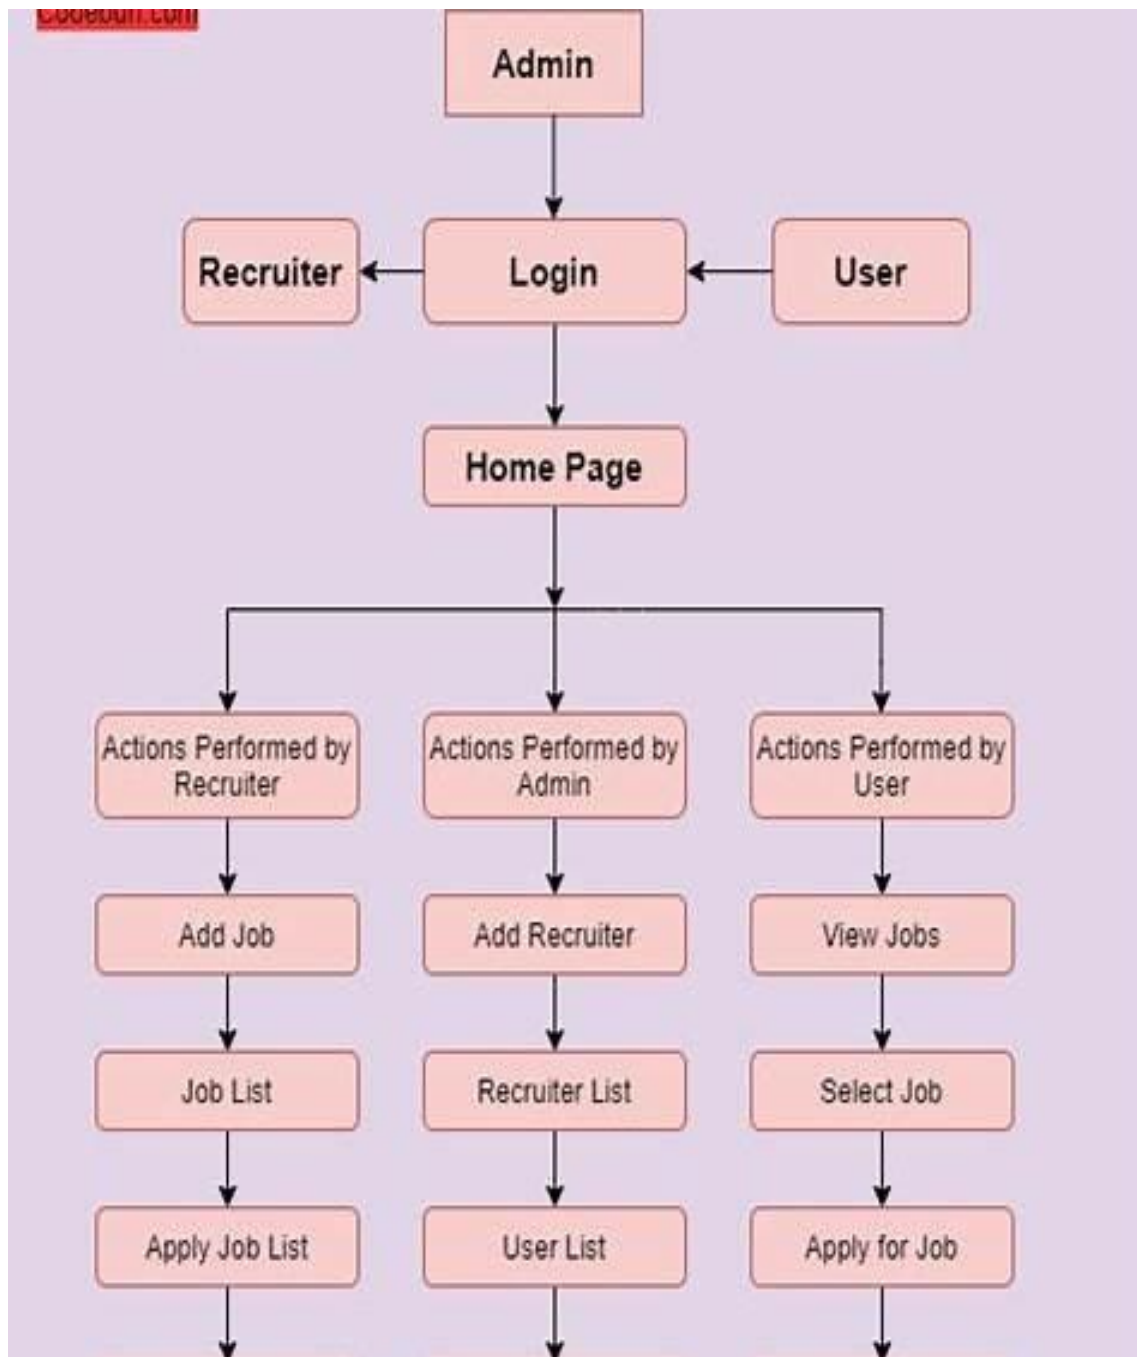

For Students:

- Access to personalized job recommendations based on skills, qualifications, and interests.
- Tools for building professional resumes, preparing for interviews, and tracking job applications.
- Skill development through integrated training modules, certifications, and workshops.
- Opportunities for internships, campus placements, and networking with recruiters.

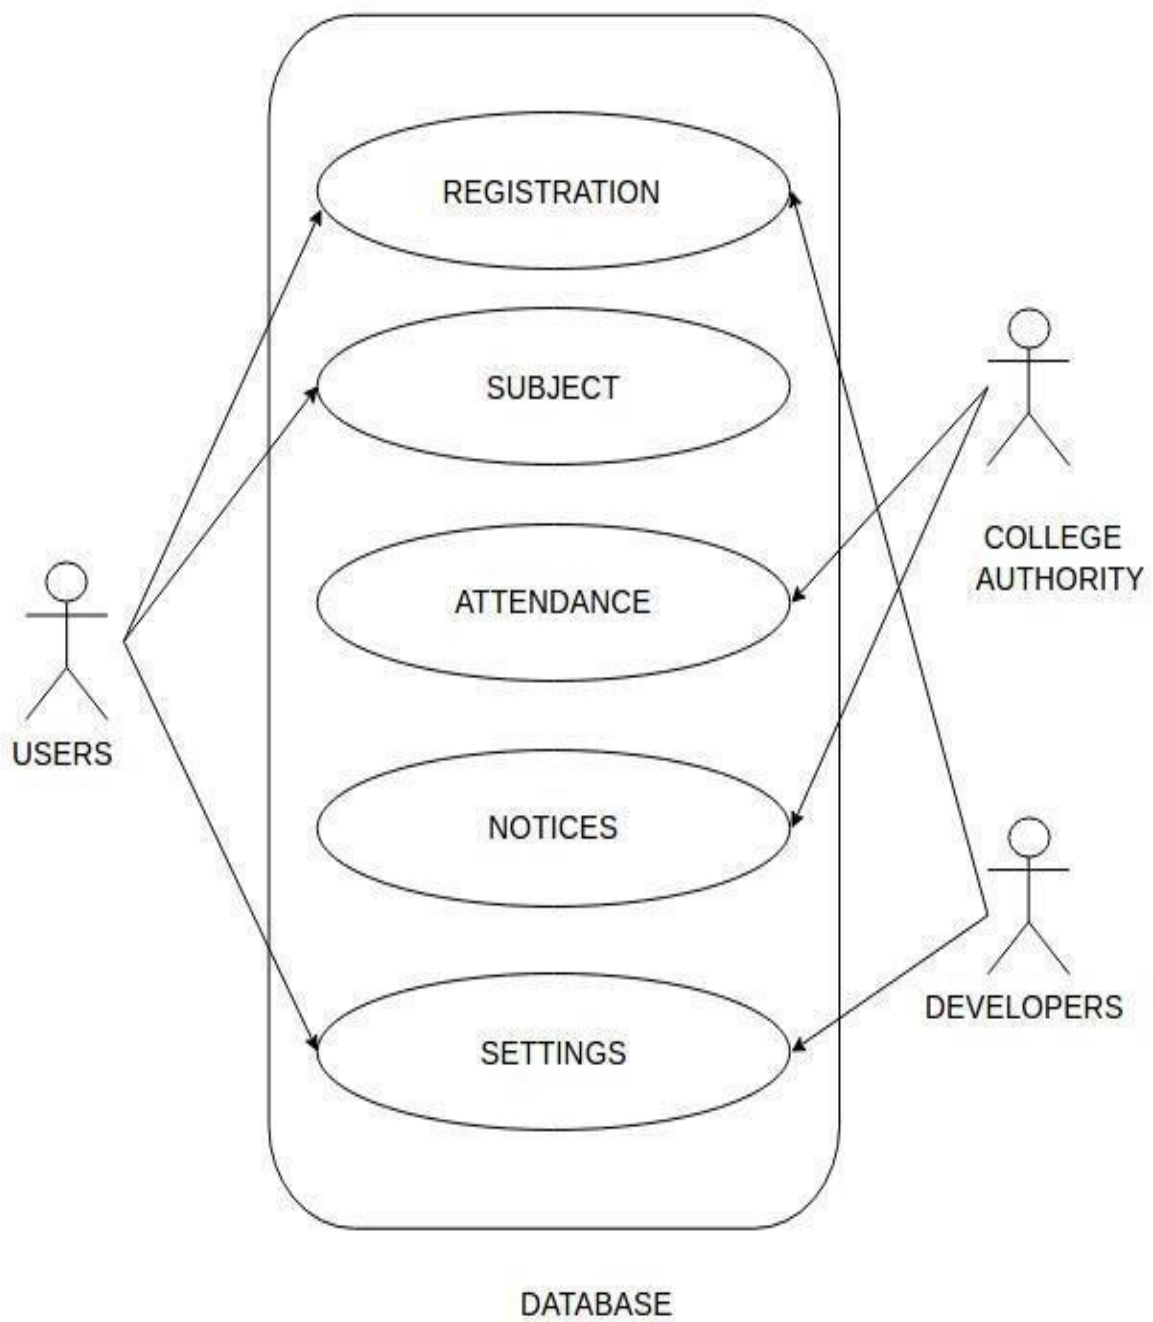

For Faculty:

- Analytics dashboards to track student performance and placement readiness.
- Tools to identify skill gaps and recommend targeted training programs for students.
- Collaborative features to connect with industry professionals for guest lectures, internships, and placement opportunities.
- Enhanced mentoring through real-time progress updates and insights into industry trends.

8. Requirements

8.1 System Requirements

- **Front End Tool** - HTML, CSS, JAVASCRIPT, REACT
- **Data Base** - SQL
- **Back End** - NODE, EXPRESS
- **Internet requirement**

8.2 Operating System Requirements

- windows 8 and above.

8.3 Hardware Requirements:

Server Side:

- Operating System: Windows 8.1 or Above
- RAM: 4 GB or more
- Hard Drive: 20 GB or

more Client side:

- Operating System: Android version 4.2 and above.
- RAM: 512 MB or more

8.4 Technology Required

- Android platform is required to run the application with version 4.2 or above.
- SQLite for managing the database.
- PHP for creating the API for the database.
- Third party libraries like Volley and Glide etc.
